

## Where do you want to live?

With all the bad news bludgeoning Americans in their local media every day, let's talk about a place where things are pretty good.

It's a place where almost every single citizen has health care coverage, including every child and every working poor person.

It's a place where 1/3 of seniors have prescription drug assistance.

It's a place ranked Healthiest State in America for the past 3 years in a row.

It's a place whose children consistently exceed the national average in every area of educational performance.

It's a place where there were only 7 homicides in 2002, in the entire state.

It's a place where child domestic abuse has dropped almost 50%, and child sexual abuse has dropped by more than 70%.

It's a place where teachers aren't being laid off due to budget cuts. It's a place where police aren't being laid off due to budget cuts. It's a place where fire fighters aren't being laid off due to budget cuts.

It's a place where the government spends tax dollars wisely, and saves a bit for emergencies.

It's a place where the family of every newborn child gets home visits and offers of assistance in parenting skills, child care and job skills training.

The place? **It's Vermont.**

Who was the guy in charge for the past decade there?  
**Governor Howard Dean, M.D.**

You don't have to move to Vermont to enjoy its advantages. Just move this good man into the White House this year, so he can bring them to us in South Carolina.

**Vote Howard Dean for President,  
and bring a better life to you.**
